EXPERIENCE

Product Designer **Fireart Studio**

Sep 2022 - Present

- Designed and maintained the design system for a government platform - developed the full colour logic and token structure, built and documented components, and was responsible for ongoing system support across teams.
- Led end-to-end redesign of a B2B logistics website - owned the full design process from discovery to delivery, including a quote calculator and service pages adapted for different user types.
- Redesigned SadieActive mobile fitness app, improving training and nutrition flows through user research to create a more intuitive, seamless mobile-native experience.
- Contributed to a cybersecurity product, structuring key user flows with a focus on trust, transparency, and ease of use in a complex technical environment.
- Designed cross-platform interfaces for a fintech app (NDA) - virtual accounts, blockchain wallets, cross-border payments - and built a scalable cross-platform design system.
- Collaborated on GETTR, a large-scale social platform (400k daily users), contributing to feature design and maintaining a shared design system for consistency across teams.

UX/UI Designer Trainee **Fireart Studio**

Jul 2022 - Aug 2022

- Assisted senior designers in creating wireframes, UI components, and design concepts, developing foundational skills in design execution.
- Helped maintain design system consistency across multiple projects.
